ACG NJ Corporate Growth Awards 2026: Vibra Screw's legacy of custom innovation

The Association for Corporate Growth – New Jersey (ACG NJ) will host its annual [Corporate Growth Awards](#) on May 5, 2026, at The Palace at Somerset Park. Each year, ACG NJ highlights innovative companies that create and execute new ideas, processes, products and services that deliver meaningful value to customers, partners and the broader community.

We hope you will join us at this year's event, where you will meet Ellen Skibiak.

Skibiak serves as Treasurer/CFO and co-owner of [Vibra Screw Inc.](#), one of this year's honorees. She works alongside her brothers, Gene and Richard Wahl, continuing a second-generation family legacy built by their father, Eugene A. Wahl more than 70 years ago.

Built on customization

From its founding, Vibra Screw has rejected the idea that a "one-size-fits-all" solution can address every challenge.

Instead, its sales and engineering teams work closely with clients to understand their unique needs — developing tailored solutions that deliver long-term value. This philosophy reflects the elder Wahl's belief in hard work, fairness and accountability, and his commitment to treating every relationship with integrity.

Innovation at its core

Innovation has always been central to Vibra Screw's approach. Its focus on custom solutions enables the company to help clients improve efficiency — becoming faster, more precise and more profitable in their operations. The company takes pride in solving complex challenges for businesses with highly specific requirements.

Lessons from decades of growth

On May 5, Skibiak will share insights gained from working across a wide range of industries — from food production to hypersonic missile applications — developing prototypes and unconventional solutions that support customer success.
